

AQUARIUM MODE

QUICK REFERENCE CARD

NYTHOS // v1.0.0
SECURE · MONITOR · ANALYZE · DEFEND

CONTROLS

Esc	exit
F11 F	toggle fullscreen
F2	drop to windowed dashboard
H	toggle HUD
M	toggle audio
T	demo a threat (spawn predator)
S	manual sonar sweep
W	summon a whale
+ -	add / remove a fish

RUN MODES

windowed	dev / background dashboard
fullscreen	splash + full experience
screensaver	exits on any input
kiosk	conference / demo machine

python -m aquarium --mode <mode>
or NythosAquarium.exe --mode <mode>

EASTER EGGS

Konami code	fish become dragons
type freda	scuba diver + glowing laptop
type mythos	giant phoenix silhouette
type debug	FPS / counts / memory overlay

ASSESS IN 60 SECONDS

- ☐ Fish school & wander organically; none identical
- ☐ Press T → water darkens, predator, scatter
- ☐ Press S → sonar ring, curious fish approach
- ☐ AI beam periodically scans & clears a fish
- ☐ Type debug → FPS steady, RSS memory flat
- ☐ Palette stays violet/cyan; red only on threat

SIGNAL → VISUAL CHEAT SHEET

Calm violet water, soft schooling	endpoint healthy
Livelier fish, stronger current	high CPU load
Water darkens & reddens + predator + scatter	risk threshold crossed
Expanding cyan sonar ring	network spike
Dashed beam + reticle, fish pulses emerald	AI analysis (then cleared)
Bubbles & drifting motes	ambient life

STATES

- SECURE healthy — calm, relaxed schooling, soft bubbles
- ACTIVE busy — high CPU; faster fish, stronger current
- THREAT risk high — predator hunts, schools scatter, glitch

HUD LEGEND

top-left	NYTHOS · AQUARIUM MODE (brand)
top-right	status · Health & Risk (0–100)
top-right	CPU% · MEM% · NET KB/s
bottom-left	debug overlay (FPS, counts, RSS) — type debug

FIELD MARKS

Predator (ransomware) = large dashed silhouette; jellyfish = dome + trailing tentacles.
